Acknowledgement

I would like to acknowledge all those who have given moral support and helped in making the project a success.

I wish to express my gratitude to the e-Projects Group at the Head Office, who guided and helped me. I would also like to express my gratitude to all the staff members of my center for not only providing me with the opportunity to work with them on this project, but also for their support and encouragement throughout the process.

I also express my sincere gratitude to the e-Projects Team at the Aptech Head Office and my project guide at the organization, for her valuable guidance and support for the completion of this project.

And finally, I would like to offer many thanks to all my colleagues for their valuable suggestions and constructive feedback.

Synopsis

Pleasant Tours has been a popular type of travel in many countries since 2000, now StarTravels wants to completely change their current website. The website they require can provide user-friendly environment and navigation.

The important menu must be stated in the top section of the webpage. Also a decent look out and color combination is expected.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox..

REVIEW 1

Requirement Specification

The Web site is to be created based on the following requirements.

 1) The Home Page should be created making use of Frames with a suitable logo.

 2) The site should display a menu which will contain the options for brief introduction about the various products available, location of the shop and any other information if required.

 3) The information should be categorized according to different type of products like if a User wants to see only 'Beach Tours' then he click on a Link/button/menu etc and he will see different type of Beach Tours. Similarly for 'Hill Stations', 'Forts/Palaces' and other products.

 4) When a user selects any product type, a list of products for that product type will be displayed.

 5) Itinerary of individual tour products should be displayed on the Web Page along with the title but detailed itinerary should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.

 6) Price List for all tours should be available for download.

 7) There should be a "Contact Us" page which will have the Address of the Company which is as follows and the mail address which when clicked will invoke the local mail client from where they can send an email. Address of the Company should be displayed using GeoLocation API (eg. GoogleMaps).

Problem Definition

After reading the project specifications, the developer states the scope of the project very briefly. This is referred to as the problem definition. Queries of various staff members can be one or all of the following:

1. How many tours can be displayed on Homepage at a time?

2. What information should be displayed about each tour in Homepage?

3. What requirements and questions can users contact support?

4. Will users be able to rate with their comments?

5. Will users be able to ask questions about the service of Startravels?

After consulting several IT companies and considering the budget constraints, the management of StartTravels to launch the Web application as a single page responsive Web application using HTML5, CSS3, JavaScript, Geolocation API, and Bootstrap from getbootstrap.com, jQuery plugins, and Coffee Cup, Notepad++, or other HTML editor. Also, the site will be tested on popular browsers(Ex: Chrome, IE, Firefox etc.) and mobile emulator software.

Customers requirement specifications (CRS)

1. Client: StarTravels .

2. Business/Project Objectives:

➢ Provide a website to displays the programs and services about tours such as: "Home", "Type of Tour", "About", …

➢ Enable customers to see what event that they would like for easier interactive with us.

3. Inputs provided by clients: Inputs to the existing system. Outputs from the existing system. Process involved in the application. Expected delivery dates. List of deliverables.

4. Hardware Requirement:

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better.
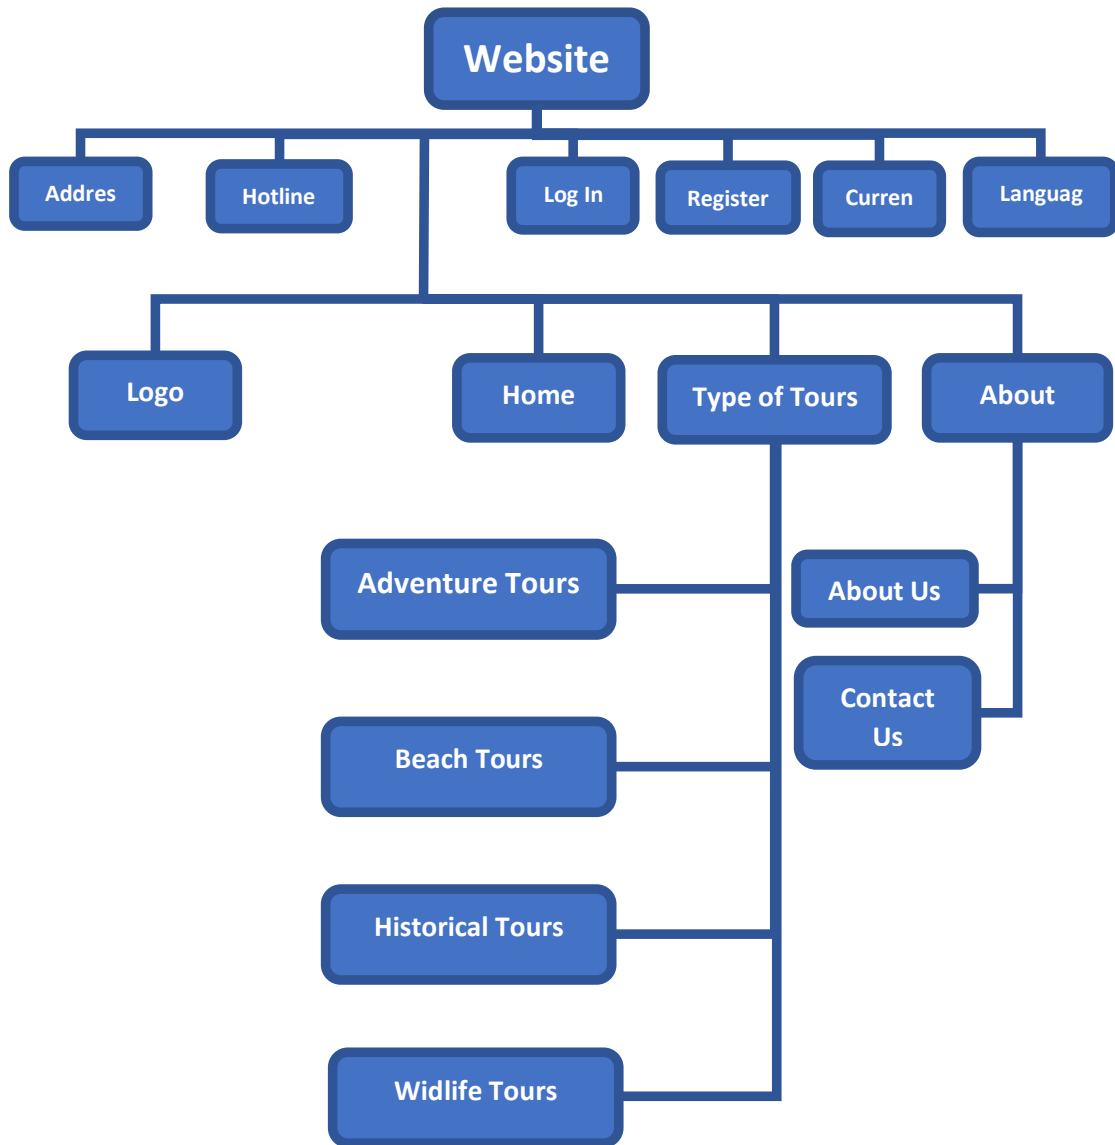

5. Software Requirements:

- Notepad/HTML editor

- Dreamweaver

- IE 5.0/ Netscape 6.0

Website Layouts

Here are our layouts which will show you how we brainstormed ideas for the StarTravels's websites. Because of being academic website, we tried to build them simple but useful and informative as much as possible.

The website is going to have several pages which include different information in the same main layout.

1. Home

This layout below describes how we create a Home page containing three important parts:

- Page title bar and navigation bar:

> The page title must have an address, hotline and other links such as Log In and Register, language conversion and currency conversion functions are optional.

> The navigation bar is one of the most important parts of the entire site that will tell people how they interact with us. It must have the StarTrvels's logo and provide some information such as search bar, Homepage, Type of Tour and Introduction. Each section must have brief information.
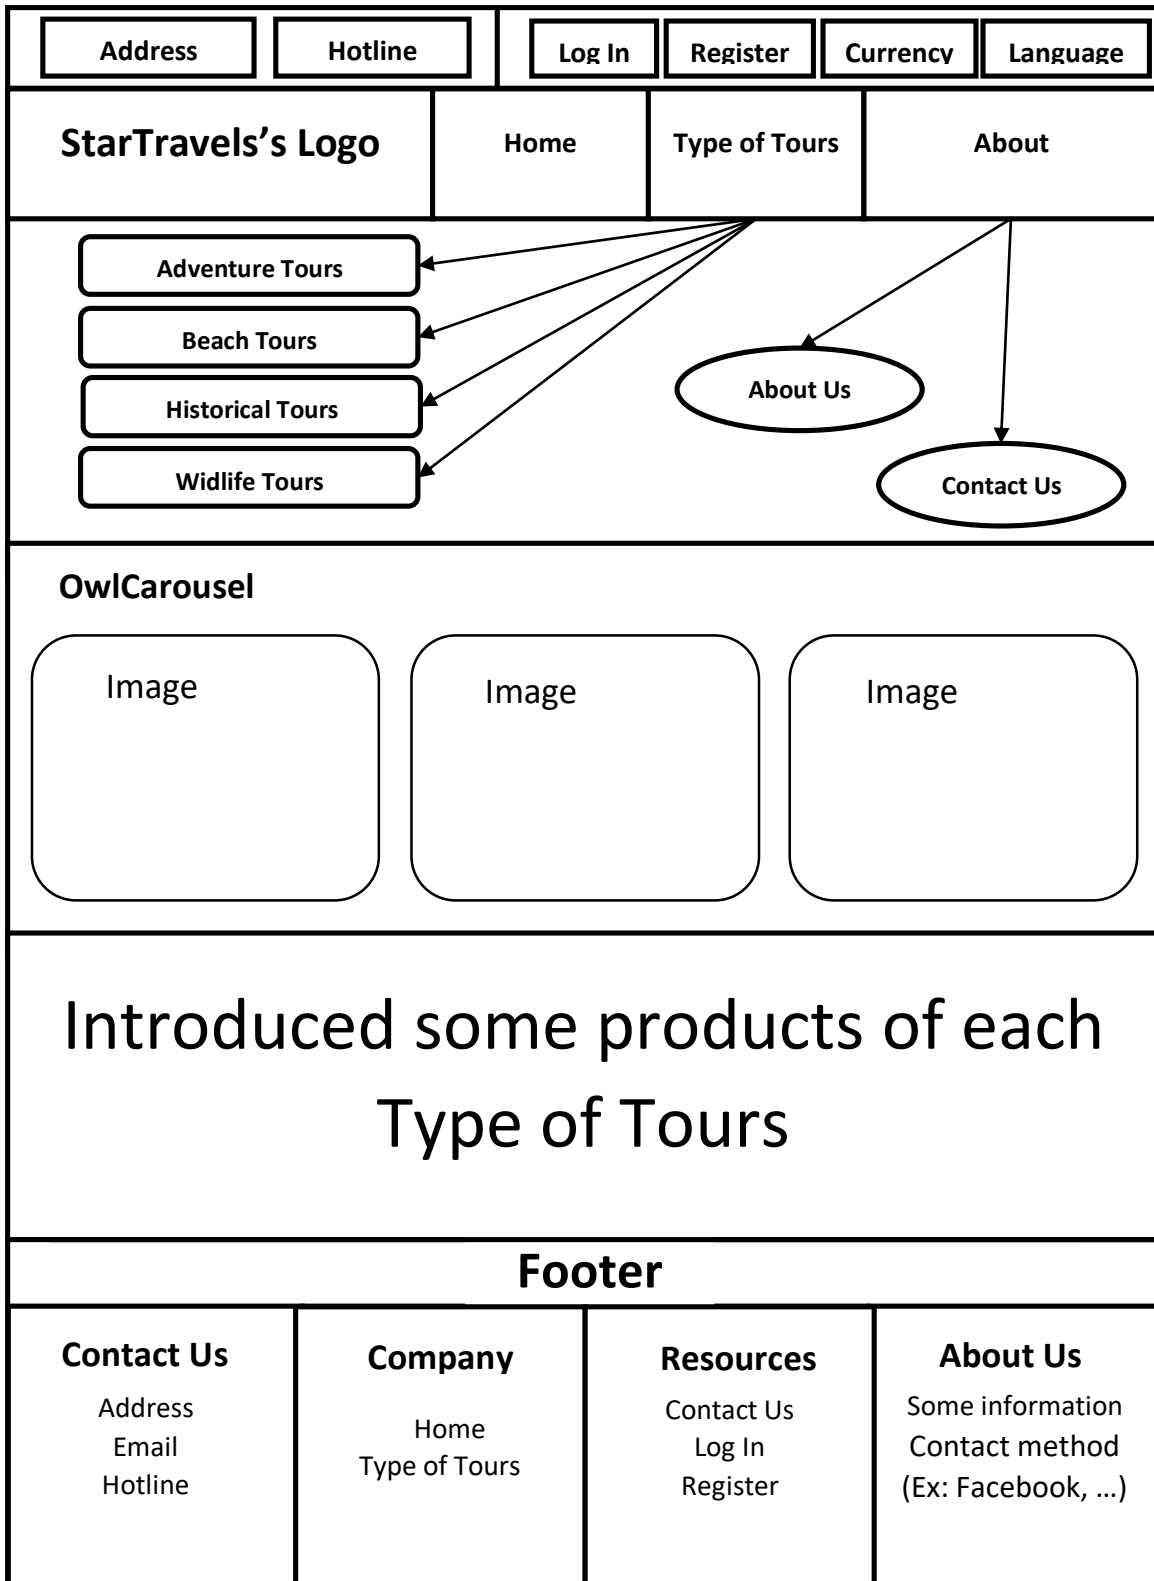

- Content:

> This section is customized to the title of individual websites, Especially, Home page includes introduction and some description about StarTravels's products.

- Footer:

> The final part of all our websites is definitely Footer which will reveal some convenient ways to contact the support switchboard in

various social channels like Hotline, Facebook, Twitter, Email, Instagram,... and summarizes the layout of the Website.
